

# **Aquaponics USA PRESS ROOM**

**Let Us Put Your District  
In The News**

**Aquaponics USA is on a Mission to help make Arizona Schools the best in the World. Part of that Mission is bringing Aquaponics as a standalone Subject into Arizona CTE, FFA & AG Programs. ([See our Newsroom Press Release dated February 28, 2026](#))**

**But that's not all. We also want to bring Aquaponics into Elementary and Middle School Education to create continuity across all Grade Levels in teaching the most important Agri-Tech to arrive on the world stage since the Industrial Revolution. ([See our "Take Your Aquaponics Program District-Wide" Doc](#)).**

**That's why we're offering District-Wide Aquaponics Projects where at least three Schools across the three Grade Levels participate for a 10% Discount on each Classroom System. And every System comes with 688 Pages of rigorous Science Curriculum for all Grade Levels. This is a complete Aquaponics Program. All Arizona School Districts need to add is a great Teacher. ([See our "Curriculum Tour" Doc](#)).**

**Why is Aquaponics so important? This Agri-Tech is Water Conserving, Multi-Crop Farming of the Future that we need today. Water Conservation, especially in Arizona, gets more important every year that we remain in what is called a multi-decade mega-drought in the Colorado River Basin, exacerbated by climate change, hotter temperatures, reduced snowpack, and chronic overuse of the river. ([See our "Colorado River Basin Water Wars" Doc](#)).**

**Water Shortages, Fertilizer Shortages, Soil Degradation and Climate change threaten food security, and Aquaponics offers the most important solutions available for all of these Crises. ([See our "FFA & Aquaponics" Doc](#)).**

**Every School District that joins our Mission, will be featured in a Series of Press Release distributed Nation-Wide in several hundred News Outlets. Let's put Arizona School Districts on the Map as the most forward looking Districts in the U.S.**
